EXPERIENCE & EDUCATION

UCLA Ziman Center for Real Estate & UCLA Anderson Forecast *Aug 2023 - Present*
Staff Economist

- Perform economic research, review, and analyze federal, state and local policy impacting real estate with an emphasis on housing markets, especially affordable housing.
- Conduct macro-economic forecasting of residential and commercial real estate markets in California.
- Produce high-level analysis for presentation at conferences and in publications to a diverse audience including academics, business executives, and government policymakers.

University of California, Irvine

Ph.D., Economics, GPA: 3.97

Jun 2023

M.A., Economics

Dec 2019

RESEARCH & PUBLICATIONS

Research Interests: Urban and Public Economics, Housing Finance, Causal Inference, Forecasting

“Housing Sales and Construction Responses to COVID-19: Evidence from Shelter-in-Place and Eviction Moratoria in the U.S.” [\[Link\]](#) *Revise and Resubmit. Real Estate Economics.*

- Collected, cleaned, and created original datasets from databases like Redfin, Census Bureau Building Permits Survey and Quarterly Census of Employment and Wages.
- Employed generalized difference-in-difference to estimate impact of shelter-in-place and eviction moratoria on relative changes in housing sales and building permits approval.
- Performed event-study analyses and applied estimator specialized for staggered treatment adoption to add robustness. Presented analytical and graphical representation of datasets and results.

“Intercity Impacts of Work-from-Home with Both Remote and Non-Remote Workers.”
with Jan K. Brueckner. *Journal of Housing Economics.* [\[Link\]](#) [\[UCLA Economic Letter\]](#)

- Formulated a spatial hedonic equilibrium model to show inter-city impacts of the introduction of work-from-home, with multiple worker types.
- Developed theoretical model that explored how work-from-home impacts city level population, employment, housing prices and welfare.

“Wealth, Property Tax Arbitrage, and California.”

with Jerry Nickelsburg. *Working Paper.* [\[Link\]](#) [\[UCLA Anderson Review\]](#)

- Empirically explores how percentage of second homes correlate with rank differentials between counties with varying incidences of effective property tax rates and marginal state income tax rates.
- Performed heterogeneity analysis of mean differences in vacant homes stratified by county-level median income, median home value and tax rank differentials.

CONFERENCES & PRESENTATIONS

92nd Southern Economic Association Annual Meeting, Fort Lauderdale	<i>Nov 2022</i>
Eastern Regional Science Association (ERSA) 2022 Congress, Pècs & online	<i>Aug 2022</i>
